Turning Housing into Opportunity

For over 30 years, DreamKey Partners has boldly led the charge in community transformation, developing affordable housing that prioritizes belonging, stability, and opportunity. We are firm believers that everyone deserves a safe and dignified place to call home.

We took our mission to new heights by completing our first environmentally focused development (Dunbar Place), which featured solar panels and EV charging stations. We also brought history to life through the adaptive reuse of Dillard School, turning a former school into beautiful, age-friendly apartments for seniors.

Our focus is not just on housing; it's about empowering people and building inclusive communities.
